

TIG™780-45 is environmentally safe silicone-based thermal grease designed to solve overheating and reliability issues.

TIG™780-45 is a heat conducting product in the shape of paste. They serve to moisten the contact surface sufficiently so as to form an interface of extremely low thermal impedance. Consequently, the heat dissipation efficiency is far superior to that offered by others.

Features And Benefits

- » Low thermal impedance
- » Non-toxic and environmentally safe
- » Excellent long term stability
- » Thoroughly wets out contact surfaces to create low thermal resistance

Application

- » Microprocessors
- » Chipsets
- » Graphic processing chips
- » Set Top Box
- » LED
